GS/M.Sc./MGT/2970/06

Thesis submitted to the University of Sri Jayewardenepura for the
award of the Degree of Master of Science in Management on

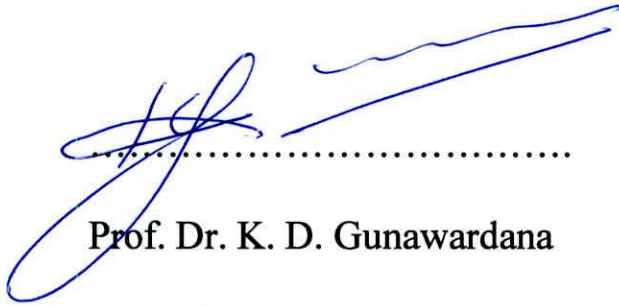

2008

The work described in this thesis was carried out by me under the supervision of Prof. Dr. K. D. Gunawardana and a report on this has not been submitted in whole or in part to any university or any other institution for another Degree/Diploma.

.....

N. Rajeshwaran

I certify that the above statement made by the candidate is true and that this thesis is suitable for submission to the University for the purpose of evaluation.

ACKNOWLEDGEMENT

My grateful thanks to Prof. Dr. K. D. Gunawardana, Professor of Accounting, Department of Accountancy, Faculty of Management studies and Commerce, University of Sri Jayawardenapura, Sri Lanka for providing me with valuable guidance and advices in carrying out this research successfully. I shall ever remember his kindness and patience, among the burden of his office works, on dedicating his valuable time in discussing and evaluating the chapters of this thesis.

I would also like to extend my gratitude to all lectures who conducted lectures for the course work of M.Sc. (Management) programme 2006/ 2007. I was able to gain the necessary knowledge in research methodology from the course work.

My sincere thanks to Dr. P. D. Nimal, Coordinator of M.Sc. (Management) programme, for giving their fullest effort in expediting the course schedule.

I express my exclusive gratitude to all the respondents who completed the questionnaires and returned them on time for enabling me to analyze the data without delay.

A special thank to my family members who were extremely helpful and always provided their fullest support.

**AN EMPIRICAL INVESTIGATION OF THE
SECURITY CONTROLS OF COMPUTERIZED ACCOUNTING
INFORMATION SYSTEMS (CAIS) IN THE SELECTED LISTED
COMPANIES IN SRI LANKA**

Nadarajah Rajeshwaran

ABSTRACT

Drawbacks of the manual accounting systems, the rapid development of IT, availability of user friendly accounting software and the increased competition have forced companies to adapt Computerized Accounting Information Systems (CAIS) in order to remain competitive whereas threats to CAIS are unavoidable in the dynamic environment. In this scenario, security controls of CAIS are vital to the organizations. This study examines the existence and adequacy of implemented CAIS security controls to prevent, detect and correct security breaches in the selected listed companies in Sri Lanka. An empirical survey using a self-administered questionnaire has been carried out to achieve the objective. 41 out of 118 usable questionnaires have been collected to different types of companies representing 13 out of 20 sectors from 4th November to 10th December 2008. The results of the study spotlight a number of inadequately implemented CAIS security controls and significant differences among listed companies regarding the adequacy of implemented CAIS security controls. Based on the findings, some recommendations are given to strengthen the breaches in the present CAIS security controls in the listed companies. Findings of this study help accountants, auditors, managers, and IT users to better understand and secure their CAIS in order to achieve success of their visions.
