## **ACKNOWLEDGEMENTS**

This Report is a result of a collective effort and there are many people to whom I owe a debt of gratitude for their assistance. Any major literary or research endeavor is unlikely to be successfully completed without substantial help from others.

Firstly, my deepest gratitude is to my supervisor Mrs P PLalani, Senior lecturer, Department of Business Economics, University of Sri Jayewardanapura (USJP) for her invaluable advice, guidance and supervision extended to me although presently she is in Korea for her own studies. Secondly I sincerely appreciate the efforts of the Coordinator of the M.Sc (Management) program Dr. P.J. Kumarasinghe for the inspiration given during the past three years. As the same time I would like to express my gratitude to Dr. P.D. Nimal, former Coordinator of the M.Sc (Management) program for giving his fullest support during his period to complete the course effectively.

The outstanding lecture panel who guided me for the last three years must also be appreciated. They have conducted lectures with their fullest energy by transferring their valuable knowledge to us and giving us valuable advice..

Further, I also express my heartfelt appreciation of the Authorities of Sampath Bank PLC and Hatton National Bank PLC for the support extended to me in collecting data. Without this assistance and support this research could not have been completed.

I wish to thank my friends and colleagues, especially my best friend who helped me, encouraged me and provided all emotional support to complete the thesis. Particularly I want thank Mr.Chesmi de Silva of the Information Technology Resource Centre of USJP for

supporting me to interpret the data. Further, I wish to thank Mrs.OraneeJansz for gave her valuable time to editing and correcting this thesis.

Finally and importantly I would like to express my gratitude to my mother, father, wife and two kids for creating the environment to complete this thesis. I dedicate this thesis to my dear family.

**Factors Affecting Non-Performing Portfolio of Credit Card Based Personal  
Financing: Case of Sampath and Hatton National Banks in Colombo**

**District**

**Warnakulasuriya M N**

**ABSTRACT**

The present experience is that credit card products are the most attractive of the financial institute products, competitively promoting the existing and prospective customers due to high interest rates and high commission income.

The current study investigates the determinants of the critical factors affecting the nonperforming portfolio of credit card based personal finance in Colombo and uses an empirical approach to analyze the data collected from the customer base of the branches of Sampath Bank PLC and Hatton National Bank PLC (HNB PLC) in the Colombo district.

The nonperforming and performing credit card holders of Hatton National Bank PLC and Sampath Bank PLC in the Colombo district were selected as the population and the convenience sampling method was applied. The Pre facility evaluation factors and the Post facility factors were considered for the study. An organized questionnaire was used to collect the data from the nonperforming and performing credit card holders.

The findings show the importance of evaluating the credit card applicants' credit worthiness and total liabilities according to their total fixed income and then setting up appropriate credit

limits and a proper repayment channel, period and amount for the card holders. A post evaluation is also recommended at the time of the renewal of the relevant credit cards.

Generalization of the results is limited by the genuineness of respondents and the level of the relationships between banks and their clients. Since the available literature on personal finance is mainly based on economic development, a study on nonperforming credit card portfolio of the financial institutes is very useful within the current credit card market in Colombo and further broader inquiry is proposed.

**Keywords – Personal finance, Financial Institutes, Credit card holders, performing credit cards and nonperforming credit cards.**
